HARVARD MEDICAL SCHOOL BOSTON

REQUIREMENTS FOR ADMISSION

All candidates must present evidence satisfactory to the Committee on Admission not simply that they have passed the courses necessary to fulfil the requirements, but also that their scholarship and their general qualifications for medicine are such as to give promise of work of high quality in the medical course.

On the above basis this School considers for admission to its classes graduates in arts or in science of approved colleges or scientific schools.

In exceptional cases applicants without a degree who have completed two or more years of work in a college or scientific school of high rank, provided they present certificates that they have scholastic standing placing them in the first third of their class, may be admitted.

Credentials from foreign universities, in most cases, must be supplemented by a year or more of work in an American university. Admission cannot be assured, as all classes are limited.

LANGUAGE AND SCIENCE REQUIREMENTS *

(a) All applicants must present evidence that they have such knowledge of English as is ordinarily required of all candidates for a degree in an approved college and that they have a reading knowledge of French or of German.

(b) They must present evidence that they have *college credits* for at least a year's work in general inorganic chemistry, in physics, in biology, and in organic chemistry.

To meet the science requirements satisfactorily, time credit in college should be secured as follows:

Inorganic Chemistry: A minimum of eight semester hours, of which at least four should be laboratory work.

* It is assumed that before admission to an acceptable college a four years' course in High School or its equivalent will have been completed.

Organic Chemistry: A minimum of eight semester hours, of which at least four should be laboratory work.

Physics: A minimum of eight semester hours, of which at least two should be laboratory work.

Biology: A minimum of eight semester hours (including not less than four hours of zoölogy), of which at least four should be laboratory work.

NOTE. — A semester hour is one hour of lecture or recitation, or two hours of laboratory work, per week for one half-year or sixteen weeks. Full courses at Harvard count as eight semester hours.

These requirements must be satisfied in full before matriculation.

Applications should be filed as early as November and be completed not later than March 1, on blanks furnished by the Assistant Dean. The Committee makes its selection late in March, accepting one hundred and twenty-five men from about eight hundred applicants.

ADMISSION TO ADVANCED STANDING

By increasing the classes to one hundred and thirty-five men in the third year, ten places, in addition to others caused by the withdrawal of the first and second year, are available for transfers from other medical schools. In exceptional cases men may be admitted to the second and fourth-year classes.

Only men of high scholastic standing will be considered. Full credit for work done elsewhere will be allowed as a rule but in certain cases additional work, especially in clinical pathology and in physical diagnosis, will be required.

They must have fulfilled the requirements for admission enumerated above prior to their matriculation as students of medicine. They must be vouched for as promising men by the Dean or by some other responsible officer of the School from which they come.

They must furnish a certificate of time spent in medical study at least equal to that spent by the class to which they seek admission.

They must furnish a certificate showing that they have done satisfactory laboratory and practical work in the subjects already pursued by the class to which they seek admission. The Committee on Admission will decide in each case whether examinations in the various subjects shall be required.

GENERAL REGULATIONS

Students registering in the Medical School for the first time will meet in the amphitheatre in Building C, on Friday, preceding the last Wednesday in September, at 10 A.M.

On entrance, each student will be interviewed by a member of the teaching staff and then assigned to an adviser. The relation between students and advisers is outside regular school duties with the exception of the thesis requirement.

A brief thesis is required of all matriculants, excepting transfer students to the third or fourth year. A suitable subject will be selected, under the guidance of an adviser, and the thesis must be completed by October 1st, of the student's third year.

*In order that the time of study shall count as a full year, students of all upper classes * must register on Monday, the first day of the session.*

For special and approved purposes students may be allowed to take a portion of their work elsewhere than at the Harvard Medical School, provided that the application be approved by the Dean in consultation with the Administrative Board and the head of the department concerned, and provided that the student pass an examination on this work after its completion, conducted by a member of the Faculty of the Harvard Medical School.

EXAMINATIONS AND PROMOTION

Students are divided into four classes according to their time of study and proficiency. The Faculty reserves the right to require the withdrawal of any student at any time whenever in the opinion of his instructors it is manifest that he is incompetent, or for any reason is unfit to continue his course.

Each student will receive a rating in each course based upon examinations or other tests as determined by each department. These marks shall be on the scale of A, B, C, D, and E (E denoting failure).

No student is allowed to anticipate the examinations in the regular course of studies of his year except by special permission of the Administrative Board.

After two failures to pass an examination each student must pay a fee of three dollars at the Dean's Office before appearing for each additional examination in the same subject.

A Promotion Board for each of the first three years, consisting of members of each department giving the principal courses during that year, will meet in February (if occasion arises), to act upon cases presented as a result of the work of the first half-year and will meet in June for the work of the entire year. The Boards will determine and send to the Dean's Office, before the final Faculty meeting in June, a mark for each student for the corresponding school year.

It is the duty of a Promotion Board, after receiving marks from the departments concerned, to promote those qualified, to warn or condition

* Excepting new students.

any student as occasion demands, to interview and examine any student as to whom it is in doubt, and to recommend to the Faculty that unpromising students be requested to withdraw.

The actions of the Promotion Boards are final, subject only to the standing rules of the Faculty which follow and to confirmation by that body. Students shall not ask for reconsideration from any member of the Promotion Boards. Such requests may be made only in case there is a change in the information upon which the action was taken, must be made in writing to the Assistant Dean, and must be in his hands before July 15th.

1. A student who fails two major subjects in one year shall withdraw from the School.

2. Passing in all subjects with a minimal grade is not sufficient grounds for promotion. Any student who has failed to be promoted under this rule, and who wishes to repeat the previous year, must apply to the Committee on Admission for permission to do so.

3. The Promotion Boards at their discretion may promote a student who has failed in one subject in a year, but such a student shall not be promoted a second time nor be allowed to take the General Examination until that failure is removed.

4. A student failing any course shall have an opportunity for reëxamination only in September or with a succeeding class or section. This rule shall not prevent a special examination, after a lapse of two months, for students who have been required to withdraw by the Promotion Boards.

5. No course marks may be given out except by the Dean or Assistant Dean.

The Committee on Examinations will give a General Examination to each candidate for the degree of M.D., will give him a final mark, and will recommend to the Faculty those properly qualified for the degree and for honors. The Examination will include written, oral or practical tests, at the discretion of the Committee. It will be held in June and provided there are qualified applicants in February and may be held at other times if the Committee so decides.

The conditions under which a student may be allowed to take his General Examination, and the character and conduct of the Examination, will be determined by the Committee, subject only to the rules of the Faculty which follow :

1. The Committee on Examinations shall not admit a student to the General Examination unless he has passed at least seven-eighths of his fourth-year courses, including medicine and surgery, and fulfilled all of the other requirements of the Faculty.

2. A student who has failed three times in a General Examination shall be debarred from further attempts.

WITHDRAWAL FROM THE SCHOOL

A student may withdraw from the School, upon application to the Assistant Dean. *Application for reinstatement must be made at least four months prior to the date of readmission.* If reinstatement is delayed more than a year, application must be made in competition with other candidates for admission. The return of fees and bond cancels registration.

DEGREES

DEGREE OF DOCTOR OF MEDICINE

Every candidate for the degree of DOCTOR OF MEDICINE at this University must be at least twenty-one years of age, and of good moral character. He must have fulfilled all the requirements for admission to this Medical School; give evidence of having studied in a recognized medical school at least four full years, of which one year must be spent in the regular fourth-year course of this School; have passed all the required examinations; have dissected the three parts of the body to the satisfaction of the demonstrator; have taken charge of and reported on twelve cases in Obstetrics under supervision and instruction; and furnish evidence of having engaged in the practical exercises in Medicine and Surgery.

The degree of Doctor of Medicine *cum laude* or *magna cum laude* may be given to students of highest rating in the class, on recommendation of the Committee on Examinations.

Every candidate for the degree of M.D. must make application for it in writing on blanks furnished at the Dean's office, on or before *May 1* of the year in which he proposes to graduate.

HIGHER DEGREES IN THE MEDICAL SCIENCES

The degrees Master of Arts, Doctor of Philosophy, and Doctor of Medical Sciences have been established for advanced work in some special field in the Medical Sciences. The first two degrees are voted by the Faculty of Arts and Sciences upon the recommendation of a Committee consisting of members of the Faculties of Medicine and of Arts and Sciences. The degree of Doctor of Medical Sciences is administered by the above Committee, excepting the members from Harvard College, and the degree is voted by the Medical Faculty. All candidates for these degrees must hold a degree in Arts or in Sciences from an approved college. These degrees are not awarded for mere reason of faithful study for a prescribed time, but primarily for high attainment in a selected science.

MASTER OF ARTS AND DOCTOR OF PHILOSOPHY

Candidates for the degree of Master of Arts must register in the Graduate School of Arts and Sciences, and pursue an approved course of study in medical science for at least one year.

Candidates for the degree of Doctor of Philosophy must fulfil certain preliminary requirements described in the general University Catalogue, must devote to approved advanced studies not less than two years — at least one of which must be spent in residence at this University — and must pass general examinations and present an account of original work in an accepted thesis, before being granted the degree.

The fees are \$400 for each year.

DOCTOR OF MEDICAL SCIENCES

Candidates for this degree must matriculate as medical students and complete with an honor grade the regular elementary courses offered by this School in Anatomy, Histology and Embryology, Physiology, Biological Chemistry, Bacteriology, Pathology, Pharmacology and Clinical Pathology, together with such other subjects as may be recommended by the Committee. In addition all candidates are required to have a reading knowledge of French and German. Ordinarily this preparatory training will be equivalent to the first two years of the course of study leading to the degree of M.D. Students who have completed all or a portion of this work in other approved medical schools may be admitted to candidacy upon presenting evidence that they have passed the above subjects or their equivalents with an honor grade, and upon passing the general examination described below.

Following the completion of this preliminary training the student shall devote himself for not less than two years to the intensive study of one of the fundamental medical sciences and to the preparation of a thesis. The thesis must show an original treatment of a fitting subject and give evidence of independent research.

There shall be two examinations for every candidate for this degree, a general examination, before entering upon the work of the last two years, covering the elementary medical sciences listed above; and a final examination, upon acceptance of the thesis, covering the particular medical science chosen as a special field.

The fees for the first two years are the same as for medical students.

Further information concerning the higher degrees may be secured from Dr. HALLOWELL DAVIS, Secretary of the Division of Medical Sciences, Harvard Medical School.

FEES AND EXPENSES

DEGREE OF DOCTOR OF MEDICINE

The fees are :—For matriculation, \$5; for instruction (including laboratory charges except breakage, damage and loss of apparatus), \$400 for each year.

Tuition will be charged on the term-bills in four instalments, as follows :—

One-fourth on a term-bill issued and payable September 22.

One-fourth on a term-bill issued November 12 and payable November 29.

One-fourth on a term-bill issued January 12 and payable January 30.

One-fourth on a term-bill issued April 13 and payable April 30.

(Miscellaneous charges such as breakage, etc., on a term-bill issued June 12 and payable July 10.)

The matriculation fee will be charged on the term-bill of September 28. Rental for Dormitory rooms is payable on the second and fourth term-bills. Bills for miscellaneous charges will be rendered at the time the indebtedness is incurred. A deposit of \$50 is required of every new student who accepts a place in the Medical School; this sum to be applied on his first term-bill or to be forfeited if the student does not register.

An estimate of total yearly expenses shows that the average cost of the school year is \$1,275 for the last three years, and \$1,400 for the first year when, in addition to other expenses, a microscope must be bought. This estimate includes tuition, board and room, books, laboratory fee, laundry and incidentals.

Any student whose indebtedness to the University remains unpaid on the date fixed for payment is deprived of the privileges of the University until he is reinstated. Reinstatement is obtained only by consent of the Dean of the Department in which the student is enrolled, after payment of all indebtedness and a reinstatement fee of \$10. *Students will be held responsible for the payment of fees until they have notified the Dean, in writing, of their intention to withdraw from the School, and have subsequently received their bond from the Bursar.*

Matriculants are required to own their microscopes and hemocytometers. These must be of a type acceptable to the Medical School. Their cost will be about \$130.00. In exceptional cases, upon application to the Dean's Office before September 1, a matriculant may be permitted to rent a microscope.

A deposit of \$1 with the Superintendent of Buildings will entitle the student to the use of a locker in the School buildings.

LOANS

A loan fund has been established from which students who are in need of money may borrow.

Loans will be made to students in the Second, Third, and Fourth-year Classes, and, rarely to men in the second half of the First Year, whose records have been sufficiently creditable to make it probable that they will remain in the School.

It is recommended, unless a student sees reasonably clearly how he will meet the expenses of at least the first year in the School, that he postpone his entrance until he can save money enough to get fairly started without having ahead of him oppressive financial worry. Only a limited amount of outside work can be done without being a tax on the student's health and scholarship.

See page 56 for Loan Funds.

DORMITORY

Vanderbilt Hall, the Medical School dormitory, has accommodations for 335 students. The price of rooms ranges from \$125 to \$370 for the academic year of thirty-nine weeks. Applications for rooms in the dormitory should be sent to the Dean of the Medical School before May 1. Students permitted to reëngage their rooms must file at the Dean's Office new room agreements on or before March 10, 1931.

The dormitory contains a large dining hall which is available for all members of the Medical School. Meals are served at reasonable prices.

There are four tennis courts, five squash courts, and a gymnasium, which are open to members of the teaching staff and students of the Medical School.

BOND REQUIRED OF STUDENTS

Every student is required to file with the Bursar on his entrance to the School a bond in the sum of \$500 signed by two bondsmen, one of whom must be a citizen of the United States, or by a surety company duly qualified to do business in Massachusetts, as security for the payment of his bills to the University; or he may deposit with the Bursar \$500 in United States bonds for the same purpose.

No officer or student of the University is accepted as a bondsman.

MEDICAL ATTENDANCE

The Medical School provides a physician to students, who will give medical advice without charge during the school year. His office hours are from 1 to 2 o'clock daily, except Saturdays, H. M. S., Room 103, and at other times by appointment.

Any illness necessitating absence from work must be reported to the Dean's Office either by the attending doctor or by the student if he has not been to a doctor.

Students who are in financial distress from conditions imposed by illness may receive help from the Alumni Association Gift which is available for this purpose.

Under the auspices of the Department of Medicine a physical examination will be given each student during the academic year 1930-31.

Evidence of having been satisfactorily vaccinated is required for entrance to Harvard University.

For information regarding the Stillman Infirmary see the *University Catalogue*.

BUILDINGS

The course in Medicine, established by Harvard University in 1782, was given in buildings of the College, University Hall and Holden Chapel, from its establishment until 1810, when the classes were transferred to Boston. In 1816 the first Medical School building was erected. From 1882 until 1906 the School occupied the building at the corner of Boylston and Exeter Streets, now used by Boston University.

In 1906 the University completed a notable group of white marble buildings on Longwood Avenue for the Medical School. These buildings are five in number and with their surrounding grounds occupy eleven acres of land in the outskirts of Boston. One of these is designed for administration and four for housing the laboratory departments, and for laboratory and clinical instruction.

The Administration Building, with over 40,000 square feet of floor space, contains the Faculty Room, the Dean's offices, the joint library of the Medical School and the School of Public Health, and the Warren Museum.

The laboratory buildings, designated by the letters B, C, D, and E, are all constructed on the same general plan. Each consists of two parallel wings united at the front by an amphitheatre with a seating capacity of two hundred and fifty. Both the smaller rooms and the laboratories were designed on a unit system which greatly simplifies the changes required in making these suited to the needs of departments whose methods of teaching have changed since the rooms were originally designed.

The amount of floor space varies considerably in each of the four buildings, but the design is such that this variation is not apparent from the main quadrangle.

Building B accommodates the department of Anatomy, Histology, and Embryology. The wings each have three floors and a total floor space of over 52,000 square feet.

Building C provides space for the departments of Physiology, Physical Chemistry, Biochemistry, and Experimental Surgery. In this building each wing has four floors and a total floor space of 62,000 square feet.

Building D is occupied by the departments of Bacteriology, Pathology, and Tropical Medicine. In this building there are five floors in one wing and three floors in the other, with a total floor space of over 48,000 square feet. The Animal House is between buildings B and D.

OUTLINE PLAN OF THE HARVARD MEDICAL SCHOOL

Building E houses Pharmacology, Preventive Medicine, and Comparative Pathology. There are three floors in one wing and four floors in the other, with a floor space of 35,000 square feet.

The outline plan of the buildings and their position is shown on p. 40.

The clinical departments are housed in the various hospitals associated with the School. Vanderbilt Hall, the dormitory for medical students, is immediately adjacent to the Medical School buildings.

LIBRARIES

The joint library of the Medical School and the School of Public Health is on the second floor of the Administration Building, and in the other buildings are branch libraries. By an arrangement with the Peter Bent Brigham Hospital, library facilities for the hospital are available here. This library is open from 9 A.M. until 10 P.M., on Saturdays from 9 A.M. until 5 P.M. and on Sundays from 1 P.M. to 5 P.M. During the summer vacation, the Library is open on week-days from 9 A.M. until 10 P.M., on Saturdays from 9 A.M. until 12 M., and on Sundays is closed throughout the day. The present number of volumes in the library is 54,504, and in addition there are 123,660 pamphlets and 525 current periodicals kept on file.

The College Library at Cambridge is open to the students of this School.

The Boston Public Library is open to students who are inhabitants of Boston. Students, not inhabitants of Boston, who have filed a bond at the Bursar's office, may also use this library. The Bursar will furnish on application the necessary certificate of bond.

The Boston Medical Library, No. 8 The Fenway, contains about 149,882 bound volumes and 98,871 pamphlets, and approximately 668 current periodicals are on file. This very valuable library is open to those who desire to consult medical literature, on week days from 9.30 A.M. to 10 P.M., on Saturdays till 6 P.M.

LECTURESHIPS

The Cutter Lectures on Preventive Medicine were established in 1912 under the deed of gift contained in the will of Dr. John Clarence Cutter. These lectures are given annually and are open to the medical profession.

The Edward K. Dunham Lectures for the promotion of the medical sciences have been given annually since 1923 by eminent investigators and teachers in one of the branches of the medical sciences or of the basic sciences which contribute toward the advance of medical science in the broadest sense. The lectures are open to the Faculty and students of the Harvard Medical School and College and all other interested professional persons. The lectures are given under the fund established for that purpose by Mary Dows Dunham in memory of her husband, Dr. Edward K. Dunham.

The George W. Gay Lectures upon Medical Ethics are given annually to the advanced or graduating classes of the Harvard Medical School. The fund for the establishment of these lectures was given in 1917 by Dr. George W. Gay.

WARREN ANATOMICAL MUSEUM

The Warren Anatomical Museum was founded in 1847 by JOHN COLLINS WARREN, of the College Class of 1797, Adjunct Professor of Anatomy and Surgery from 1809 to 1815, Hersey Professor of Anatomy and Surgery from 1815 to 1847, Professor *Emeritus* from 1847 to his death in 1856, son of JOHN WARREN, the first Hersey Professor of Anatomy and Surgery. This important Museum is open to students in the School, and its collections are used in demonstration of the lectures. It occupies the upper three floors of the Administration Building. Myrtelle M. Canavan, M.D., is Curator.

The collection has over twenty thousand specimens, illustrating both normal and pathological anatomy. Students and graduates may have access to these specimens at any time upon application to the Curator.

Besides dissections and serial sections of bones, the anatomical collection includes many injections, corrosion preparations, models and groups of bones, notably the Dwight collection of spines, hands and feet, Tello collection of skulls, etc.

The pathological collection of "hand" specimens, conveniently housed in 40-gallon tanks, is for the use of students, and mounted specimens illustrate the major diseases.

There is a collection of medico-legal material which has a section to itself and forms a basis for teaching.

The American Ambulance of Paris has contributed a number of specimens from the European War, especially interesting for a student of military surgery.

HOSPITAL FACILITIES

The transfer in 1810 of the Medical School of Harvard University from Cambridge to Boston was made in order to secure the advantages of the larger clinical facilities which are to be found in large cities. Clinical advantages from the students' viewpoint are not a matter of large hospitals only, but rather are related to the number of patients in these hospitals who are under the care of instructors on the staff of the Medical School and available for teaching purposes. This School is closely affiliated on the above basis with the hospitals described in the following list, thus offering Harvard Medical School students an unrivaled opportunity to secure a well-organized clinical experience and knowledge of disease. Each student comes into intimate contact, under supervision, with patients

in these hospitals, beginning in the second half of the second year and increasing until the fourth year, when the students serve as clinical clerks and give all their time to the study of patients.

The Massachusetts General Hospital.—This is a general hospital associated with the Medical School since its foundation in 1821. There are services in Medicine, Surgery, Pediatrics, Dermatology, Genito-Urinary diseases, Orthopaedics, Neurology, and Syphilis, all of which are used in giving instruction in these special departments of medicine. The hospital has 714 beds, 606 of them being available for teaching purposes. In the General Hospital 7,801 patients were admitted last year and there were 139,591 patient days treatment. Large out-patient departments in the above clinical departments are also used for instruction. 44,287 new patients were admitted to the out-patient department last year for a total of 267,424 visits. 12,349 patients were treated in the Emergency Ward. Laboratories in Pathology, Chemistry, and X-ray are maintained, and there is an excellent medical library, all of which are open to students in the Medical School.

The Boston City Hospital.—This hospital which, in all its divisions, contains 2,066 beds (including 362 bassinets and cribs) 1,118 of which are in the main hospital and all of which are available for teaching purposes, serves as one of the teaching units for the Medical School. The 2d and 4th Medical services, the 5th Surgical, the Neurological and Pathological services are under the direction of Professors at the Harvard Medical School. In addition there are divisions of Pediatrics, Gynaecology, etc., open to medical students. In the out-patient department, (main hospital and two Relief Stations) 117,163 new patients applied for diagnosis and treatment during the year 1929. They furnish additional teaching material. Clinical laboratories are maintained for research, pathology, nephritic, diabetic and basal metabolism, blood, pediatric, immunological and neurological work. The X-ray service is very large and important. Instruction to medical students is given here daily. There is an excellent library, including 69 current medical journals.

The Boston City Hospital, South Department.—This hospital is for contagious diseases and occupies a block by itself adjacent to the Boston City Hospital proper. It has a capacity of 338 beds and has abundant material for clinical instruction. Students make ward visits three or more times a week. During the year 1929 there were 1,881 cases treated, of which 707 were scarlet fever, 453 were diphtheria, and 52 were measles cases.

Hospital Department—Sanatorium Division.—The Boston Sanatorium for tuberculous patients at Mattapan is a department of the Boston City Hospital. It has a capacity of 410 beds and a daily average of 339 patients. New buildings, affording increased bed capacity, are being

erected. During eight months of the year two to six fourth-year students of Harvard Medical School spend eight hours daily for one week in this hospital under the supervision of the Resident Physician.

The Peter Bent Brigham Hospital.—This hospital has been closely associated with the Medical School since its dedication in 1913. It is for general medical and surgical cases, and is situated on grounds adjacent to the Medical School buildings. There are 246 beds, all of which are used for teaching purposes. There is also maintained an out-patient service for ambulatory medical and surgical patients to which 7,849 new patients applied during the past year. The total number of visits was 75,593. There are well-equipped medical, surgical, and pathological laboratories. The hospital, by special arrangement, makes use of the library of the Medical School.

The Children's Hospital.—The buildings of this hospital are on Longwood Avenue, adjacent to the Medical School. This hospital maintains a medical, surgical, orthopaedic, nose and throat, and a well-babies clinic. There are 224 beds, of which 176 are available for teaching purposes. During the year there were 5,825 cases treated in the wards, and 57,827 visits were made to the out-patient department. Well-equipped laboratories are provided for the study of material from the wards and out-patient service.

The Infants' Hospital (Thomas Morgan Rotch Jr. Memorial Hospital for Infants).—This hospital is adjacent to and under the management of the Children's Hospital. There are 66 beds, all of which are devoted to the care of infants. 914 were treated during the year. All of the cases in this hospital are available for teaching.

The Boston Lying-in Hospital.—This hospital occupies a building completed in 1923 at 221 Longwood Avenue. Of the 131 beds, 103 are used for teaching. During the past year 2,429 patients received treatment in the hospital, of whom 1,941 were delivered. In addition, in the out-patient department, 1,139 cases were attended under supervision by third and fourth-year students. A well-equipped laboratory is available.

The Free Hospital for Women.—This hospital is devoted exclusively to the surgical treatment of diseases peculiar to women. The hospital has a capacity of 94 beds, of which 62 are available for teaching. In the out-patient department there are about 7,000 consultations yearly. Library and laboratory facilities are available.

Boston Psychopathic Hospital.—This is a state institution for acute, curable, incipient, and doubtful cases of mental disease. The hospital was opened to patients in June, 1912. It has 110 beds, all of which are available for teaching, and receives patients at the rate of about 1,800 a year. The hospital is equipped with psychological, neuropathological and bio-

chemical laboratories. The out-patient department receives patients at the rate of over 1,000 a year. In addition to the psychoses and neuroses, the clinical material includes cases of mental defect and disorder in childhood, cases of mental instability, and of delinquency.

The Massachusetts Eye and Ear Infirmary. — There are 231 beds in this hospital, 189 of which are used for instruction in diseases of the eye, ear, nose and throat. Over 7,500 patients are treated in the wards, and last year there were 90,873 out-patient visits. Pathological and X-ray laboratories are maintained.

The Beth Israel Hospital. — This is a general hospital with a capacity of 190 beds (including 20 pediatric beds), 120 of which are available for teaching. The institution is located on Brookline Avenue around the corner from the Harvard Medical School. The Hospital is equipped for teaching and research, having a medical research and pathological laboratory, each under the direction of a full-time physician who is associated with the Faculty of the Harvard Medical School. There are also electrocardiograph and basal-metabolism laboratories, animal research equipment, and an extensive X-ray department. 3866 patients were admitted to the hospital last year and spent 49,475 patient days in the institution. 7,590 patients made 43,829 visits to the out-patient department during the year.

The Collis P. Huntington Memorial Hospital and the J. Collins Warren Laboratory of Bio-Physics. — This hospital and laboratory of the Cancer Commission of Harvard University afford opportunity for the study of human tumor cases. The aim of the hospital is to study special problems concerning the natural history and the treatment of tumors. It affords a means for early diagnosis, treatment, or advice regarding therapeutic measures. There are 22 beds, all of which are available for teaching purposes; out-patients are received at stated hours. During the past year, 1,663 new patients were treated in the house and out-patient department.

The Boston Dispensary. — 146,305 visits were made by approximately 27,000 different patients to the daily morning clinics and evening pay clinics of this institution during the past year. Students have opportunity for seeing practical work in the diagnosis and treatment of cases in all branches of medicine and surgery. Undergraduates are taught in the Surgical Clinic twice a week during the School year. Otherwise the use of the Dispensary by the Harvard Medical School is mainly for graduate instruction.

HOSPITAL APPOINTMENTS

About eighty appointments as internes and assistants are made annually to hospitals in and about Boston for terms of service varying from six months to two years. These appointments are made after a competitive examination.

THE CANCER COMMISSION OF HARVARD UNIVERSITY

The Cancer Commission of Harvard University was founded in 1899, by the late Mrs. Caroline Brewer Croft, who left in her will a sum of money for the investigation of the cause and treatment of cancer. Since that time other sums have been contributed for cancer research, and the Cancer Commission of Harvard University was organized in 1909. Its work is carried on chiefly at the Huntington Hospital and its laboratories.

HARVARD INFANTILE PARALYSIS COMMISSION

A Commission for the purpose of assisting in the early recognition, treatment, and study of infantile paralysis was appointed by the Corporation September 25, 1916.

This Commission shortly after it was established was appointed agent of the State Department of Health, thereby assuring coöperation with the Commonwealth. The Commission also coöperates with the Vermont Board of Health. Roger Pierce, *Chairman*, Richard C. Curtis, *Treasurer*, W. Lloyd Aycock, M.D., George H. Bigelow, M.D., Hermann F. Clarke, Homer Gage, M.D., Arthur T. Legg, M.D., James J. Minot, Jr., Robert B. Osgood, M.D., W. Rodman Peabody, Redfield Proctor, Milton J. Rosenau, M.D., Richard M. Smith, M.D., Charles H. Taylor, Hans Zinsser, M.D.

HARVARD EPILEPSY COMMISSION

A Commission for the study of epilepsy was appointed by the Corporation in June 1928.

The Commission plans to conduct research into the various convulsive conditions in coöperation with various hospitals and the Department of Neuropathology at the School. At present, particular attention is being devoted to the biochemical aspects of the disease, but the Committee stands ready to investigate any promising suggestions. Bronson Crothers, M.D., *Chairman*, Robert Amory, Walter B. Cannon, M.D., Stanley Cobb, M.D., Christian A. Herter, Halfdan Lee, Ralph Lowell, Fritz B. Talbot, M.D.

PROCTOR FUND

A bequest of fifty thousand dollars by Ellen Osborne Proctor, for the purpose of promoting the study of chronic diseases, subsequently has been increased by an additional fifty thousand dollars from another member of the Proctor family. The income of this fund is to be devoted to investigations into the nature and treatment of chronic diseases and the care of persons afflicted with these diseases while in hospitals for such investigations. The special disposition of the income of this fund is under the control of a committee composed of the professors of Theory and Practice of Physic, Clinical Medicine, and Pathology. Henry A. Christian, M.D., is Chairman of the Proctor Fund Committee.

WILLIAM W. WELLINGTON FUND

In 1925 a bequest was received from William H. Wellington to establish the "William W. Wellington Memorial Research Fund." The income of this fund is to be applied for research concerning the etiology and therapeutics of the diseases of man, and is to be administered by a Committee composed of the heads of the departments of Pathology, Medicine, and Pharmacology. S. Burt Wolbach, M.D., is the Chairman.

COURSES FOR GRADUATES

The object of this division of the Medical School is to offer to graduates in Medicine opportunities to continue their studies in a thorough and scientific manner.

While all courses are intended primarily for those who hold degrees from recognized medical schools, certain courses in the scientific subjects are adapted to the needs of advanced students and teachers of science. Such persons may be admitted to courses on the approval of the Administrative Board.

Undergraduate students of medicine may be admitted to such courses as they are qualified to take. Special consideration for the needs of such students will be given in the plans for summer courses.

Laboratory facilities at the Harvard Medical School and the abundant clinical opportunities in the various hospitals are available for graduate instruction. Frank R. Ober, M.D., Assistant Dean, is in charge.

SCHOOL OF PUBLIC HEALTH

This School was opened in 1922 to organize under one Faculty courses in Public Health, some of which were previously offered by other departments of the University and of the Massachusetts Institute of Technology.

Its object is to provide the scientific groundwork which underlies efficient health administration.

Courses in Bacteriology, Parasitology, Epidemiology, Communicable Diseases, Tropical Medicine, Public Health Administration, Physiology, Nutrition, Ventilation and Illumination, Vital Statistics, Sanitary Engineering, Child Hygiene, Mental Hygiene, Industrial Hygiene, are offered, which aim to train the student to become an intelligent Public Health official. Opportunity is also given to students wishing to pursue research in Public Health. Any course may be taken singly, or a student may devote a considerable period of time to one subject. For further information, apply to the Secretary.

FELLOWSHIPS AND SCHOLARSHIPS

FELLOWSHIPS

*Applications for fellowships should be in the hands of the Dean
on or before March 2.*

Students who marry while on a fellowship will forfeit the fellowship unless at the time of their application they have notified the Committee of their intention to marry.

AUSTIN FELLOWSHIPS. A certain number of teaching fellowships have been established from the income of the Austin Fund and assigned to the Medical School. *Each, \$900*

EDWARD HICKLING BRADFORD FELLOWSHIP. Established in 1918 by an anonymous gift. The Fellowship may be used for research or instruction separately or in connection with any other foundation in such manner as the Corporation may from time to time prescribe. *\$1,250*

THE JOHN WHITE BROWNE SCHOLARSHIP. Established under the will of Mrs. Francis B. Greene in 1918. This scholarship is to be awarded by the Dean of the Medical School to a young man (graduate or matriculated student) of unusual promise, to enable him to pursue research investigations for a year at the Harvard Medical School or elsewhere. *\$1100*

BULLARD FELLOWSHIPS. Established in 1891 by a gift from WILLIAM STORY BULLARD of Boston, "in memory of three physicians who were distinguished for their honorable personal character and for their professional services in this community." The three following fellowships were established:—

THE GEORGE CHEYNE SHATTUCK MEMORIAL FELLOWSHIP . .	\$425
THE JOHN WARE MEMORIAL FELLOWSHIP	425
THE CHARLES ELIOT WARE MEMORIAL FELLOWSHIP	400

The income from any one or all of these fellowships may be paid to any student or member of the medical profession who shall be selected by

the Administrative Board of the Medical School to make such original investigations in Medical Science as in their opinion will be most useful to the profession and to the community. The results of such investigations shall not, however, be published as a research performed under the grant of a Bullard Fellowship, unless the work shall have received the approval of the Committee. If published with the approval of the Committee, mention shall be made of the fact that the work was done under a Bullard Fellowship.

Holders of Bullard Fellowships are required to do an amount of work equivalent to not less than ten hours a week throughout the academic year and to present to the Committee at the end of the academic year a report on the amount and result of the work performed. There are offered also from School research funds other students' research fellowships of \$300 each under similar conditions.

ARTHUR TRACY CABOT FELLOWSHIP. Established in 1913 by a gift from Dr. and Mrs. Frederick Cheever Shattuck, in memory of Arthur Tracy Cabot, M.D., of the Class of 1872. The holder of the Fellowship is not ordinarily to engage in active private practice while holding it but is to devote himself to the advancement of Surgery whether in the United States or elsewhere. The nomination to this Fellowship is, by preference, to be in the hands of the Moseley Professor of Surgery. \$1500

THE JAMES JACKSON CABOT FELLOWSHIP. Established in 1906 by a gift from Arthur T. Cabot, Samuel Cabot, and Guy C. Cabot. In 1912 Guy C. Cabot added to this fund. The income remaining after adding a certain percentage to the principal each year is preferably, but not necessarily, to be used for a fellowship "to aid and encourage practical work in scientific medicine." \$800

CHARLES FOLLEN FOLSOM TEACHING FELLOWSHIP. Established in 1908 by gifts from more than sixty persons in memory of Charles Follen Folsom, A.B. 1862, M.D. 1870, Lecturer on Hygiene, 1877-79, on Hygiene and Mental Diseases, 1879-80, on Mental Diseases, 1880-82; Assistant Professor of Mental Diseases, 1882-85, and Overseer, 1891-1903. It was the desire of the givers that there be established in the Medical School a Charles Follen Folsom Teaching Fellowship in Hygiene or in Mental and Nervous Diseases, and that the incumbent receive the annual income of the fund, or such part of it as may be consistent with the standing rules of the Corporation in such cases. This fellowship has been assigned to the Department of Hygiene until the further order of the President and Fellows. \$800

THE CHARLES SEDGWICK MINOT FELLOWSHIP. Given by Mrs. Charles S. Minot in memory of Dr. Charles Sedgwick Minot, to be awarded to an undergraduate in the Medical School to help him in conducting investigative studies. \$200

WILLIAM O. MOSELEY, JR., TRAVELLING FELLOWSHIPS. Established in 1912 by a bequest of Mrs. William O. Moseley for men who have attended the School for three or four years, for further study in Europe. Either two or three Fellowships will be awarded from the income, which is approximately \$5600.

HENRY P. WALCOTT FELLOWSHIP IN CLINICAL MEDICINE. Founded in 1910 by Frederick Cheever Shattuck, A.M., M.D., LL.D. "The income to provide for the support of a Fellow in Clinical Medicine, who shall receive his appointment from the Corporation on nomination by the Jackson Professor of Clinical Medicine, who, while the holder of the Fellowship, shall not engage in private practice but devote his time to teaching and clinical research work." \$1800

DR. WILLIAM HUNTER WORKMAN SCHOLARSHIP. Established in 1925 by a gift from William Hunter Workman, M.D. 1873, to enable one or more graduates of the Harvard Medical School to pursue post-graduate studies in medicine in this country or abroad. In exceptional cases, fourth-year students will be eligible. \$1300

SCHOLARSHIPS

Scholarships are open only to students who are members of the School at the time of application.

The Cheever, Greene, Haven, and Mears * Scholarships are awarded to students of the first-year class. The Hayden and Webster Scholarships may be so awarded. All the other scholarships are awarded to members of the three upper classes.

Scholarships and gratuities are awarded to such men among those applying for and needing assistance as give evidence of having done the best work in this School.

Information with regard to all forms of pecuniary aid may be obtained from the Director of Scholarships. Students requiring aid should visit the Director as soon as possible after matriculation to discuss with him their financial needs.

Applications from second, third, and fourth-year students must be made on or before May 1, 1930.

Applications for the Cheever, Greene, and Haven Scholarships must be handed to the Director of Scholarships on or before *December 1*.

LOAN FUNDS

Apply to Director of Scholarships.

AESCULAPIAN CLUB LOAN FUND. Founded by the Aesculapian Club in 1925. To be used as a loan fund to aid students in the Medical School. \$63

COTTING GIFT. Received from the late Dr. Benjamin E. Cotting to be given to such medical student or students as the Administrative Board may select, having regard to the pecuniary needs, intellectual capacity, faithfulness and earnest endeavor, rather than to highest scholarship merely. \$200

THE DAVID L. EDSALL REVOLVING LOAN FUND. Dr. Frederick C. Shattuck in 1927 established this fund by gift of \$100,000 to be used as a revolving loan fund. Applications must be made by September 15th but in an unforeseen emergency at a later date. Loans are made to meet term-bills and cash is provided rarely. Amounts up to \$400 may be loaned to a student during any one year, and up to a total of \$1,000 during the course, 5 % interest being charged. The notes are payable two years after graduation or earlier. Loans are made only to those whose work in the School is satisfactory. Recent matriculants may apply for loans only in their second half-year and then only in case of unanticipated financial difficulty. The amount likely to be available in any year is somewhat above \$15,000

HENRY EHRLICH MEMORIAL FUND. Established in 1927 by the friends and family of Dr. Henry Ehrlich. The income is to be used for the assistance of needy and worthy students regardless of creed or color. It is hoped that in later years they will return the amount received. \$580

THE CHARLES WILLIAM ELIOT LOAN FUND. The first gift to create a loan fund in honor of PRESIDENT ELIOT was made in 1924 by an anonymous donor. The principal and interest from the fund are to be used for loans to students in the Medical School. \$310

JOHN FOSTER FUND. The income of the John Foster Fund is available in alternate years in the Law School and in the Medical School, for one or more meritorious students needing assistance. The next assignment in the Medical School will be made in 1930-31. \$200

THE JAMES GOLDTHWAITE FREEMAN FUND. Founded in 1925 from a bequest under the will of Caroline S. Freeman for the assistance of meritorious and deserving medical students. \$62.10

THE LOAN FUND OF THE MEDICAL CLASS OF 1879. The Medical Class of 1879 has given the sum of four hundred and thirty-six dollars and seventy-nine cents to be used as a loan fund to aid any student or students in the Medical School in accordance with the request of the Class, or, in the absence of such request, under the direction of the Faculty of Medicine. \$300

FRANCIS SKINNER FUND. Established in 1905, to be used in small sums to meet the urgent needs of meritorious students in the payment of term-bills or other expenses. This fund remained as an anonymous gift until 1908, when by vote of the President and Fellows of Harvard College it was named in honor of the late Francis Skinner, Esq., the donor. Available annually. \$270

Fellowships and Scholarships available in other Departments of the University as well as in the Medical School

Unless otherwise stated, applications should be made, before February 15, to the Dean of the Medical School.

THE FREDERICK SHELDON FUND FOR TRAVELLING FELLOWSHIPS AND SCHOLARSHIPS. The income of this Fund is available for holders of any degree from Harvard University. About sixteen fellowships are awarded, the maximum amount being \$1,500

THE PARKER FELLOWSHIPS. Established in 1873 in memory of John Parker, Jr., for the instruction, education, and maintenance of one or more students of eminent natural talents or genius for some one or more of the sciences taught in the University. Available for study at the University or in foreign countries. Three at \$1,400

THE STOUGHTON SCHOLARSHIP. Established in 1701 from a bequest of Lieutenant Governor WILLIAM STOUGHTON. The income of three thousand and fifty dollars is available for one or more students in any department of the University, preference being given first to students of Dorchester and second, if there be none such, to students of the town of Milton.

THE VICTOR EMMANUEL CHAPMAN MEMORIAL FELLOWSHIP; with an income at present of sixteen hundred and fifty dollars. Founded in 1917 by a number of persons who gave jointly the sum of approximately twenty-five thousand dollars in memory of VICTOR EMMANUEL CHAPMAN, of New York, of the Class of 1913, who was killed in action over Verdun, June 23, 1916, while a member of the Flying Corps of the French Army. This fellowship is to be assigned to a French youth (or youths) for study in some department of Harvard University.

THE DANIEL A. BUCKLEY SCHOLARSHIPS; for graduates of the public schools of the city of Cambridge.

THE CHARLES ELLIOTT PERKINS SCHOLARSHIP; with an income of five hundred dollars, "to be offered each year to a graduate of an Iowa College or University, in any of the graduate or professional departments of Harvard University."

THE JAMES A. RUMRILL SCHOLARSHIP; with an income at present of three hundred dollars. This Scholarship, founded in 1909 by Mrs. JAMES A. RUMRILL, in memory of her husband, JAMES AUGUSTUS RUMRILL, of Springfield, Mass., of the Class of 1859, will be offered each year to a properly qualified graduate of a college or university in Virginia, North Carolina, South Carolina, Florida, Georgia, Tennessee or Kentucky.

THE PRINCETON FELLOWSHIP; with a stipend of six hundred and twenty-five dollars. From a graduate of Princeton University, to be awarded to a graduate of that University studying in any department of Harvard University.

THE JOSEPH HODGES CHOATE MEMORIAL FELLOWSHIP; with an income of twenty-one hundred dollars. Established in 1919 by the Harvard Club of New York City in memory of JOSEPH HODGES CHOATE, of the Class of 1852, American Ambassador to Great Britain from 1899 to 1905. To be awarded, upon the nomination of the Vice-Chancellor of the University of Cambridge, England, to a British subject coming from the University of Cambridge to study in any department of Harvard University. The terms at present require that the candidate shall be either a Bachelor of Arts of not more than three years' standing from the time of taking his degree, or a matriculated undergraduate of not more than three years' standing from the date of his matriculation.

OTHER SCHOLARSHIPS. The following Fellowships and Scholarships, open to students in other Departments of the University, are available also for students in the Medical School: Ellen S. Bates Scholarship, Baxendale, Caspar Henry Burton, Jr., Charles Downer Fund, Lieutenant Charles Henry Fiske, 3d, Scholarship, Alan Hudson and Frederick E. Parlin. There are also scholarships for students from certain states and localities, for descendants of donors, and for men nominated by Harvard Clubs.

Further information about these scholarships may be obtained from the *University Catalogue* for 1930-31.

PRIZES

The Bowdoin, Dante, Sumner, and Toppan Prizes, offered by the Faculty of Arts and Sciences, are open to students in all departments of the University. Full particulars in regard to these prizes may be found in the *University Catalogue* for 1930-31.

ANNOUNCEMENT OF COURSES

The "Announcement of Courses" comprises a statement by each Department as to its general plan of instruction and its various required exercises, followed by a résumé of the Fourth-Year Elective Courses and the Voluntary Courses.

Each student in the fourth year must secure credit for eight one-month courses of 144 hours or their equivalent. Required courses fill seven months' time, leaving one month free for elective work. Students may anticipate certain of the required courses during the summer preceding the fourth year and thus gain more time for elective work in the fourth year. In the following statements whole courses have a value of 144 hours, half-courses of 72 hours, and quarter-courses of 36 hours.

Students who devote their spare time to intensive work in a defined field will be given advice and guidance by Tutors who are freely available for that purpose. In the Fourth Year, the Faculty encourages those men who have shown suitable qualities to devote their time largely to concentrated work in a single broad field. Not more than 15% of the class is given the privilege. Men who wish it, apply individually to the Administrative Board, stating in detail their plan of work, after securing the approval of the Tutor and the teacher under whose guidance the actual work will be done.

An opportunity for voluntary work is offered to second- and third-year students on Tuesday and Thursday afternoons. It is believed that upper-classmen will welcome a chance to keep in touch with the most recent developments in the fundamental sciences; that an interest in certain fundamental subjects will have been aroused by their clinical work; or that they may feel the desire for additional training on some point. Students are not required or even asked to take this work: it is entirely a voluntary matter, and no credit will be given.

Pamphlets describing the opportunities for elective and voluntary work in detail and outlining the special conditions under which such work may be undertaken are issued to the students each spring.

In the department of Anatomy, instruction is given in Anatomy, Histology, and Embryology. The department occupies the Morgan Anatomical Building, the dissecting rooms being in the wing designated B I, and the laboratories for Histology and Embryology in the wing B II. There are separate rooms for second-year, fourth-year and graduate students and for various kinds of technical work. The class work is carried on by sections in unit rooms, designed to accommodate either twelve or twenty-four students. There is a large library which contains complete files of the most important anatomical and morphological journals, together with many standard works of reference, and in an adjoining room there is a collection of about thirteen thousand pamphlets. A card catalogue and a classified bibliography give ready access to the literature.

The Embryological Collection is a unique feature of the laboratory. It comprises about twenty-three hundred series of sections of carefully selected vertebrate embryos, and affords therefore opportunities for research in comparative embryology such as cannot be found elsewhere. The collection includes eighty series of sections of human embryos, several of which are of exceptional value, among them being two of the very youngest stages of man yet obtained. The collection of embryological models contains the standard series and many unique original models.

REQUIRED COURSES

ANATOMY A AND B. *First Year.*—The courses of the first year are intended to teach human anatomy, both gross and microscopic, together with the es-

entials of human embryology. Half of the time is devoted to work in the dissecting room, the other half to work in the histological and embryological laboratories. In the study of gross anatomy, each student makes a complete dissection of one half of the human body, and all of the class dissect the same part at the same time. Two men will be assigned to the same subject, and will work together during the course. The study of the skeleton is carried on with the dissection, and each student will be provided with a box of bones which may be kept throughout the course. There will be lectures or demonstrations which are arranged to correspond as closely as possible with the work in the dissecting room. These lectures not only will serve as a guide to the regular work in the dissecting room, but also will be used to emphasize those details of human anatomy which the student cannot easily study for himself in his own dissection. Special dissections made by prosectors from the second-year class, frozen sections, and various anatomical specimens and preparations will be displayed each day to illustrate and supplement that part of the subject treated in the lecture, or about to be studied in the dissecting room. Students are urged to examine these specimens carefully, and to discuss them informally with the instructors. Students will be quizzed each week on their work in the laboratory by the instructors in charge of their section. Practical examinations only will be given in the first year.

The part of the course dealing with microscopic anatomy is a study of cells, tissues, and organs, from the developmental standpoint. The fundamental tissues and the various organs are traced to their adult form by the aid of chick embryos of 30 and 48 hours and pig embryos of 40 days, and sections of adult material. The course follows as nearly as possible the work in the dissecting room. In connection with the uterus, the human placenta and fetal membranes are considered, and several exercises are devoted to the central nervous system and sense organs.

ANATOMY C. *Second Year.* — The course in second-year anatomy is conducted twice a week during the first term. The class is divided into two sections. The work will consist of the careful study of frozen sections of the human body. Charts, special dissections, and preparations will be displayed in the laboratory to illustrate the various structures seen in the sections. Correlation of the structures in the sections and in dissected cadavers will be stressed, and unusual opportunity for such correlation is furnished by the collection in the Dwight Room which adjoins the laboratory. Each pair of students will be furnished with actual photographs of twenty selected sections of the body, life size or slightly reduced, on heavy mat paper suitable for outlining and coloring. At each exercise will be given talks on the practical clinical application of the anatomical relations, surface landmarks, surgical approaches, etc.

The course is intended to serve as a topographical review of the work of the first year, and to lead to a close correlation of anatomy and the clinical courses in physical diagnosis. Once a week a lecture in applied anatomy is given by teachers in the Departments of Medicine, Orthopaedic Surgery, Genito-Urinary Surgery, Gynaecology, Otology, or Ophthalmology. There will be one or two short examinations during the course. A final written examination will cover the work in both first and second-year courses in anatomy.

In the Laboratories of Physiology, the Departments of Physiology and Physical Chemistry of the Harvard Medical School coöperate with the Department of Physiology of the School of Public Health in offering courses of instruction and opportunities for research in the biological and physico-chemical problems of general physiology, in comparative physiology, mammalian physiology, and the physiological problems of general and industrial hygiene.

REQUIRED COURSES

PHYSIOLOGY A. First Year. — In the lectures of this course the object is to acquaint the student with the more fundamental concepts of physiology and to consider in detail those portions of the subject that are essential to an understanding of the phenomena of health and disease in man.

The laboratory exercises aim to discipline the student in the method of experimentation as applied to the acquisition of physiological knowledge, and to give him first-hand experience with the principal types of experiment employed in the analysis of function.

Conferences and demonstrations supplement the more formal instruction.

FIRST YEAR

HOURS

Lectures and Laboratory work. Drs. CANNON, DRINKER, REDFIELD,*
DAVIS, and GREGERSON, assisted by other members of the staff.

Three days a week, second half-year.

232

FOURTH-YEAR ELECTIVE COURSES

PHYSIOLOGY 1. Investigation. Drs. CANNON, FORBES, REDFIELD, and DAVIS. Students will not ordinarily be received for less than two full courses.

PHYSIOLOGY 2. Physical Chemistry of Physiological Processes. Drs. HENDERSON, COHN, and FERRY. Investigation. Not less than one full course.

Biological Chemistry

OTTO FOLIN, Ph.D., S.D., M.D., *Hamilton Kuhn Professor of Biological Chemistry.*

CYRUS H. FISKE, M.D., *Associate Professor of Biological Chemistry.*

HARRY C. TRIMBLE, Ph.D., *Assistant Professor of Biological Chemistry.*

SAMUEL B. NADLER, A.B., *Teaching Fellow in Biological Chemistry.*

NORWOOD K. SCHAFER, M.S., *Teaching Fellow in Biological Chemistry.*

YELLAPRAGADA SUBBA ROW, M.B., *Austin Teaching Fellow in Biological Chemistry.*

* Leave of absence, 1930-31.

REQUIRED COURSES

BIOLOGICAL CHEMISTRY A. *First Year.*—The lectures in this course consist of a brief discussion of the theories of chemical constitution and a survey of those classes of chemical substances which are to be found in animals and plants, and of the general principles and more important facts of physiological chemistry.

The laboratory practice is designed to acquaint the student with some of the more important constituents of living matter and their chemical behavior, and with some of the routine methods of biochemical investigation.

Conferences and discussions of selected topics supplement the main work of the course.

FIRST YEAR

HOURS

Lectures and Laboratory Work. Drs. FOLIN, FISKE, and assistants.

Three times a week, second half-year.

232

FOURTH-YEAR ELECTIVE COURSES

BIOLOGICAL CHEMISTRY 1. Whole courses, forenoons, afternoons, or all day, June and July, February through May.

VOLUNTARY COURSES

ADVANCED WORK. Students who are especially interested in methods and problems of biological chemistry will be given opportunity on their free afternoons to do advanced work.

Bacteriology

HANS ZINSSER, M.D., S.D., *Professor of Bacteriology and Immunology.*

J. HOWARD MUELLER, Ph.D., *Silas Arnold Houghton Associate Professor of Bacteriology and Immunology.*

HUGH K. WARD, M.B., D.P.H., *Assistant Professor of Bacteriology and Immunology.*

BENJAMIN WHITE, Ph.D., *Assistant Professor of Bacteriology and Immunology and of Preventive Medicine and Hygiene.*

FRANCIS B. GRINNELL, M.D., *Associate in Bacteriology and Immunology.*

JOHN F. ENDERS, Ph.D., *Instructor in Bacteriology and Immunology.*

WILLIAM A. HINTON, M.D., *Instructor in Bacteriology and Immunology and in Preventive Medicine and Hygiene.*

ROBERT N. NYE, M.D., *Instructor in Bacteriology and Immunology.*

ELLIOTT S. A. ROBINSON, M.D., *Instructor in Bacteriology and Immunology and in Preventive Medicine and Hygiene.*

MONROE D. EATON, Jr., M.D., *Assistant in Bacteriology and Immunology.*

LEROY D. FOTHERGILL, M.D., *Assistant in Bacteriology and Immunology and in Pediatrics.*

JOHN L. JACOBS, M.D., *Assistant in Bacteriology and Immunology.*

ELIOT F. PORTER, M.D., *Assistant in Bacteriology and Immunology.*

CHARLES V. SEASTONE, Jr., A.B., *Austin Teaching Fellow in Bacteriology.*

MAXIMILIANO R. CASTANEDA, M.D., *Research Fellow in Bacteriology.*

EDWARD T. C. SPOONER, M.R.C.S., L.R.C.P., *Research Fellow in Bacteriology.*

The personnel and equipment of the Department of Bacteriology and Immunology are prepared to supply teaching and opportunities for investigation to properly qualified undergraduate and graduate students in general bacteriology, pathogenic bacteriology, and the problems of immunity.

REQUIRED COURSE

BACTERIOLOGY A. *Second Year.* — The required course for medical students is taught by lectures, laboratory work, and conferences. Stress in this course is laid upon those parts of bacteriology and immunology which are directly pertinent to the pathology of infectious disease, its practical diagnosis and treatment. The students are introduced as rapidly as possible to the medical problems of bacteriology, and the subjects taught are illustrated by materials obtained from the associated hospitals. Immunological and serological technique in its practical aspects is dealt with by group instruction, and the preventive aspects of the physician's duties in relation to infectious diseases are considered as thoroughly as time permits.

	HOURS
Lectures. Drs. ZINSSER, MUELLER and staff. <i>Mondays, Wednesdays, and Fridays, first half-year.</i>	48
Laboratory work. Drs. ZINSSER, MUELLER, WARD, GRINNELL and staff. <i>Two hours, Mondays, Wednesdays, and Fridays, first half-year.</i>	96

FOURTH-YEAR ELECTIVE COURSES

BACTERIOLOGY 1. The Department of Bacteriology offers opportunity for special study for one or more months. Students will be accepted for such work and the nature of their studies will be determined by individual conferences between the applicants and members of the staff of the Department.

VOLUNTARY COURSES

BACTERIOLOGY 3. IMMUNITY. November through January. Dr. ZINSSER. Open to second, third, and fourth-year students and graduates. A course of lectures on the principles and theories of Immunity, with practical demonstrations and discussions.

BACTERIOLOGY 4. CHEMICAL BACTERIOLOGY AND IMMUNITY. Time individually arranged for. Dr. MUELLER. Open to properly qualified students. This course will consist largely of practical work and theories in connection with the more important phases of the chemistry of bacterial products and the chemical problems of immunity.

BACTERIOLOGY 5. SERUMS AND VACCINES. April, Tuesday and Thursday afternoons. Drs. WHITE and ROBINSON. The practical application of the theories of immunity to the preparation and use of biologic agents.

BACTERIOLOGY 6. DIAGNOSTIC SERUM REACTIONS. Time individually arranged for. Dr. HINTON. Open to second, third, and fourth-year men. Methods of serological syphilology diagnosis and other phases of practical diagnostic public health laboratory work.

BACTERIOLOGY 7. CLINICAL BACTERIOLOGY. April, Tuesdays and Thursdays, 3 P.M. B.C.H., Dr. NYE. The course will consist of lectures and demonstrations relative to the application of Bacteriology to the diagnosis, prognosis, and treatment of disease. Limited to twelve men from the third-year class. Application must be made at least a month in advance.

BACTERIOLOGY 8. SEROLOGICAL EXERCISES. November and December, Tuesdays and Thursdays, 3 P.M., H.M.S., Dr. WARD. A short course given in coördination with the immunity lectures, which — without endeavoring to cover the entire field — will give the student an introduction to the technical methods most frequently employed, and so chosen that they will illustrate the most important principles of serological reactions.

The Department of Bacteriology offers opportunity for special study to individual students of any of the Medical School classes.

LEGAL MEDICINE

GEORGE B. MAGRATH, M.D., A.M., *Instructor in Legal Medicine.*

REQUIRED COURSES

PATHOLOGY A. Second Year.—The course in Pathology consists of laboratory work and lectures. The basis of the laboratory work is a systematic course in pathological histology. In connection with this there are demonstrations of fresh material and museum specimens and experiments on animals bearing on the subjects studied. For demonstrations, autopsy attendance, and experimental work the students are divided into small sections. The demonstrations and experimental work are given in connection with the subjects which are being studied, in rooms adjoining the main laboratory which are adequately provided with apparatus. Lectures are given three days in the week by Drs. WOLBACH, MALLORY and staff. The object of the lecture is to expand and coördinate the knowledge which the student obtains by the study of material and to introduce important recent advances not yet incorporated in text-books. During the entire period of the course groups of students are sent to the various hospitals to see and assist in postmortem examinations. The postmortem material of the Peter Bent Brigham Hospital, the Boston City Hospital, the Massachusetts General Hospital, the Infants' Hospital, the Children's Hospital, the Huntington Hospital, the Palmer Memorial Hospital, the House of the Good Samaritan, and the Long Island Hospital is available for instruction. Each group prepares microscopical specimens of the tissues from each autopsy they attend, and immediately afterwards meets for a conference with one of the instructors, when the whole case is reviewed and discussed. At these conferences the clinical history of the case is read, and as far as possible the pathological findings are correlated with the clinical features. No attempt is made to separate the subject of Pathology into general pathology and pathological anatomy, but the subject is studied as a whole. The more important organs of the body are covered, towards the end of the course, with reference to their special pathology, particularly the blood, liver, spleen, kidneys, pancreas, and genitalia. In teaching, the student is taught methods of work, is given material, and directed, but he is taught to work independently. Tumors and other

material coming from the surgical clinics are made full use of in the course. Conferences and recitations will occasionally be substituted for regular laboratory work.

Demonstrations of gross material are held each teaching day in the Warren Museum, which is now an integral part of the Department of Pathology. Special space has been provided for the use of second-year students. The Museum is open in the evening and it is extensively utilized by students for purposes of reviews and conferences. Free access to a large collection of unmounted gross material is permitted at all times. Special collections are arranged by the Curator and are kept accessible to the students for long periods throughout the teaching course.

On Saturdays conferences and recitations are substituted for the regular laboratory work.

In the afternoons of February Drs. TYZZER and FABYAN give a course of lectures and laboratory exercises on animal parasites, particularly the protozoa and the infections produced by them.

Approximately fifty hours are given to lectures and laboratory work in neuropathology, certain exercises being interdigitated with the course in general pathology, and twelve consecutive exercises in the more special diseases of the nervous system are given in the spring. (See Neuropathology.)

At the end of the course Dr. MAGRATH gives either two or three lectures on Legal Medicine.

FOURTH-YEAR ELECTIVE COURSES

- PATHOLOGY 2.** Advanced Pathology. Drs. F. B. MALLORY and F. PARKER, Jr. B.C.H. Whole courses, all day, for one or more months during the school year.
- PATHOLOGY 3.** Advanced Pathology. Dr. WOLBACH. P.B.B.H. Whole courses, all day, for two or more months during the school year.
- PATHOLOGY 4.** Advanced Pathology. The Rôle of Allergy in the Pathology of Infectious Diseases. Dr. BRANCH. H.M.S.
- PATHOLOGY 9.** Advanced Pathology. The Pathology of the Endocrine Diseases. Dr. S. WARREN. Palmer Memorial Hospital. Whole courses, all day, offered throughout the school year.

PATHOLOGY 10. Advanced Pathology. The Pathology of Tumors. Dr. S. WARREN. H.M.H. and Palmer Memorial Hospital. Whole courses, all day, for two or more months during the school year.

PATHOLOGY 11. Surgical Pathology of Tumors. Dr. CHANNING SIMMONS and Dr. SHIELDS WARREN. H.M.H. Half-course, afternoons of January.

PATHOLOGY 12. Dr. T. B. MALLORY. M.G.H. Whole courses, or half-courses, mornings or afternoons, first half-year.

PATHOLOGY 13. Whole courses, mornings or afternoons, offered throughout the year. H.M.S. Arrangements should be made with the head of the Department.

VOLUNTARY COURSE

CLINICAL PATHOLOGICAL CONFERENCES. Once a week throughout the year, P.B.B.H. and M.G.H. alternately. Drs. CABOT, WOLBACH, and T. B. MALLORY. Students who propose to attend these exercises should give their names to the Dean's office in order that provision may be made for multigraphing the abstracts of clinical records for students' use.

AUTOPSIES. Tuesdays, November through April. Dr. MAGRATH.

Comparative Pathology

ERNEST E. TYZZER, M.D., *George Fabyan Professor of Comparative Pathology.*

DONALD L. AUGUSTINE, S.D., *Assistant Professor of Helminthology.*

MARSHAL FABYAN, M.D., *Assistant Professor of Comparative Pathology.*

MARSHALL HERTIG, Ph.D., *Assistant Professor of Medical Entomology.*

HANS THEILER, M.R.V.S., *Instructor in Comparative Pathology.*

E. ELIZABETH JONES, Ph.D., *Research Associate in Comparative Pathology.*

REQUIRED COURSES

COMPARATIVE PATHOLOGY A, PARASITOLOGY. *Second Year.*—Given on Monday, Wednesday, and Friday afternoons in February. The study of the anatomy and life cycles of the more important species of worms parasitic in the human being is provided for by fresh material for dissection, by stained sections, and by the preserved specimens of the Helminthological Collection. The student is trained to identify these parasites as they appear in the various stages of their development. Parasitic protozoa causing diseases of the human being are also considered with special reference to their identification and life cycles. Human material, cultures, and experimentally infected animals are utilized in the study of these microorganisms. The field of medical entomology is briefly surveyed, with special reference to the arthropods which transmit human disease.

SECOND YEAR

HOURS

Lectures. Dr. TYZZER. H.M.S. <i>Three times a week, January 30–February 28.</i>	12
Demonstrations and laboratory work. Drs. TYZZER, FABYAN and Staff. <i>Three two-hour periods a week, January 30–February 28.</i>	24

REID HUNT, M.D., Ph.D., S.D., *Professor of Pharmacology.*
 WORTH HALE, M.D., *Associate Professor of Pharmacology.*
 G. PHILIP GRABFIELD, M.D., *Instructor in Pharmacology.*
 FREDERICK KELLOGG, A.M., *Teaching Fellow in Pharmacology.*

REQUIRED COURSES

PHARMACOLOGY A. In the second year the instruction is given by lectures, recitations, demonstrations, and a laboratory course in which the students have an opportunity of learning the physical and chemical properties of the more important drugs and of performing experiments illustrating the physiological actions of a number of these. A few exercises are given in pharmacy and materia medica, the work consisting of demonstrations and practical exercises. Some attention is also given to toxicology. During the fourth year an opportunity is offered to students of doing more advanced work in experimental pharmacology.

SECOND YEAR

HOURS

Lectures and demonstrations. Drs. HUNT and HALE. <i>One hour, three times a week, first half-year.</i>	48
Lectures, prescription writing, and quizzes. <i>One hour, three times a week, February to May.</i>	39
Laboratory work, in sections, <i>Tuesdays, Thursdays, and Saturdays, first half-year.</i>	24

FOURTH-YEAR ELECTIVE COURSE

PHARMACOLOGY 3. Half-course, afternoons, April.

VOLUNTARY COURSES

PHARMACOLOGY 1. Dr. HALE. Tuesday and Thursday afternoons, November and December.

Medicine

Under this Division are included Medicine and the specialties relating chiefly to Medicine:—Dermatology and Syphilology, Diseases of the Nervous System (Neurology, Neuropathology, and Psychiatry), Ophthalmology, Pediatrics, and Roentgenology.

REQUIRED COURSES

The instruction given by the Department of Medicine consists in lectures, recitations, amphitheatre clinics, practical work in the out-patient departments and wards of the hospitals, and a course in clinical pathology which is given at the Harvard Medical School in the laboratory of the Department. The time given to the Department of Medicine in the medical curriculum comes in the second half of the second year and throughout the third and fourth years.

Second Year. — During the second half of the second year, instruction in the methods of history taking, physical examination, and laboratory technique is given. Also there are a few lectures and demonstrations introductory to internal medicine.

Third Year. — Throughout the third year the subjects of internal medicine are covered in exercises for the whole class by clinics or lectures which are given at the various hospitals or at the Harvard Medical School. For their practical work the students throughout this year are divided into small groups and work in the wards or out-patient departments of the four larger hospitals connected with the Medical School on problems of internal medicine. The individual student spends his entire time in one hospital, and in a small group, under the direct supervision of instructors especially assigned for this work. Voluntary courses are offered to third-year students at various times throughout the year.

Fourth Year. — In this year the students serve as clinical clerks in the wards of a general hospital for two or three months, part of which time is devoted to acting as assistants to the clinic in the out-door departments. Each student is expected to work up some problem to present for discussion during these months. In this year the students who elect three months of medicine will have special instruction at a hospital exclusively for tuberculous patients. Opportunity is offered in the fourth year for specially qualified students to take advanced courses and carry on research problems in internal medicine.

FACILITIES FOR INSTRUCTION

The instruction is given at the Harvard Medical School, the Peter Bent Brigham Hospital, the Massachusetts General Hospital, the Boston City

Hospital, the Beth Israel Hospital and several other hospitals devoted to special purposes. In these hospitals abundant and varied clinical material is available for the conduct of the numerous exercises.

SECOND YEAR

HOURS

Lectures and recitations on physical diagnosis and history taking. Dr. M. FREMONT-SMITH. B.C.H. and M.G.H.	19
Clinical Pathological exercises. Drs. AUB, MONROE and assistants. H.M.S. <i>Three times a week.</i>	90
Exercises in sections, physical diagnosis and history taking. Dr. M. FREMONT-SMITH and assistants. <i>Each student has twenty-nine exercises.</i>	58
Lectures and demonstrations on selected topics in internal medicine. Dr. JONES and associates.	24

THIRD YEAR

Lectures, recitations, and clinics on selected topics in internal medicine. Drs. CHRISTIAN, MINOT, MEANS, FITZ, BLUMGART, LOCKE, ROBEY, FROTHINGHAM, and DERICK. <i>Throughout the year.</i>	70
Exercises in sections in the wards and out-patient departments at the M.G.H., B.C.H., P.B.B.H., and B.I.H. <i>Each section has thirty-two exercises of two and a half hours each and twenty-one exercises of three hours each.</i>	143

FOURTH YEAR

Clinical clerkship at M.G.H. (Medicine 1, Dr. MEANS and associates), B.C.H. (Medicine 2, Dr. MINOT and associates), P.B.B.H. (Medicine 3, Dr. CHRISTIAN and associates), or B.I.H. (Medicine 4, Dr. BLUMGART and associates).	288 or 432

FOURTH YEAR

MEDICINE 5. Advanced studies in Medicine. Dr. MEANS. M.G.H.	
MEDICINE 6. Advanced studies in Medicine. Drs. MINOT, ROBEY, LOCKE, WEISS, CASTLE, JACKSON, and Associates. B.C.H. Special arrangements can be made for men to spend half of their time in the tuberculosis clinics.	
MEDICINE 7. Advanced studies in Medicine. Dr. CHRISTIAN. P.B.B.H.	
MEDICINE 8. Advanced studies in Medicine. Dr. BLUMGART. B.I.H.	
MEDICINE 9. Roentgenology. Drs. HOLMES, BUTLER, and SOSMAN. M.G.H., B.C.H., P.B.B.H.	
MEDICINE 10. Advanced studies in Medicine. Dr. JOSLIN and Associates. N.E.D.H.	

VOLUNTARY COURSES IN MEDICINE

- DISEASES OF THE HEART. Drs. P. D. WHITE and SPRAGUE. November, M.G.H.
- MEDICAL TREATMENT OF COMMON DISEASES. Dr. PALFREY. Tuesdays, 2 p.m., February and March, H.M.S.
- CORRELATION OF PHYSICAL SIGNS. Dr. ROBEY and associates. Thursdays, 3 to 5 p.m., March and April, B.C.H.
- HYPERTENSIVE DISEASE AND NEPHRITIS. Dr. O'HARE. October. P.B.B.H.
- CLINICAL MEDICINE. Drs. MINOT and JACKSON. B.C.H.
- DIAGNOSIS AND TREATMENT OF DIGESTIVE DISEASES. Dr. DAVIDSON. Tuesdays and Thursdays, 2 p.m., November and December, B.C.H.
- CLINICAL ELECTROCARDIOGRAPHY. Drs. LEVINE and FULTON. Thursdays, 4 to 5.30, November and December, P.B.B.H.
- DISEASES OF THE CARDIOVASCULAR SYSTEM. Drs. BLUMGART and ERNSTENE. March, B.I.H.
- CLINICAL PATHOLOGICAL CONFERENCES. Drs. CABOT, WOLBACH, and T. B. MALLORY. Tuesdays throughout the year, P.B.B.H. and M.G.H.
- SPECIAL STUDIES AT H.M.H. Dr. AUB and Associates. Time to be arranged.
- DISEASES OF THE LUNGS. Dr. R. CLIFFORD. Tuesdays and Thursdays, 2 p.m., February, M.G.H.
- CLINICAL DIETETICS. Dr. FITZ. Thursdays, 4 p.m., November and December, P.B.B.H.
- CLINICAL ILLUSTRATIONS OF PHYSIOLOGICAL PRINCIPLES. Dr. BLUMGART. Wednesdays, 2 p.m., March, B.I.H.
- DIAGNOSTIC AND THERAPEUTIC CLINICS. Dr. CHRISTIAN. Thursdays, 3.30 p.m., throughout the year, P.B.B.H.
- HEREDITY IN RELATION TO MEDICINE. Dr. KEELER. Thursdays, 2 p.m., February through May, H.M.S.

DERMATOLOGY AND SYPHILOLOGY

- E. LAWRENCE OLIVER, M.D., *Clinical Professor of Dermatology and Syphilology.*
- GEORGE A. DIX, M.D., *Instructor in Dermatology and Syphilology.*
- ARTHUR M. GREENWOOD, M.D., *Instructor in Dermatology and Syphilology.*
- EDWARD W. KARCHER, M.D., *Instructor in Dermatology and Syphilology.*
- C. GUY LANE, M.D., *Instructor in Dermatology and Syphilology.*
- JACOB H. SWARTZ, M.D., *Instructor in Dermatology and Syphilology.*
- AUSTIN W. CHEEVER, M.D., *Assistant in Dermatology and Syphilology.*
- JOHN G. DOWNING, M.D., *Assistant in Dermatology and Syphilology.*

REQUIRED COURSES

Third Year.—A series of five lectures is given on five succeeding Tuesdays in the first half-year. These lectures are elementary in character and are intended to give a bare outline only. The clinical section work is given at the Massachusetts General Hospital and the Beth Israel Hospital throughout the year, each section receiving instruction in the clinic from 10 to 1 daily. In the section work it is usually possible to present to the students most of the common important diseases of the skin and many of the manifestations of syphilis, which the students can observe and examine most minutely.

THIRD YEAR

HOURS

Lectures. Dr. OLIVER. (H.M.S.) *Five lectures, first half-year.* 5
 Section work. Clinical Dermatology and Syphilology. Drs. GREENWOOD, LANE, SWARTZ, DIX, KARCHER, and CHEEVER. (M.G.H. and B.I.H.) *Each student attends ten or eleven exercises of three hours each.* 32

FOURTH-YEAR ELECTIVE COURSES

DERMATOLOGY 1. Dr. OLIVER. Half-courses, forenoons, October, December, February, and April.

DERMATOLOGY 2. Dr. OLIVER and assistants. Clinical clerkship. Whole courses, all day, October, December, February, and April.

SYPHILOLOGY 1. Half-courses, mornings, offered throughout the school year.

DISEASES OF THE NERVOUS SYSTEM

This department is composed of three divisions :—

1. PSYCHIATRY, under Dr. CAMPBELL, at the Boston Psychopathic Hospital.
2. NEUROLOGY, under Dr. AYER, at the Massachusetts General Hospital and Dr. COBB, at the Boston City Hospital. (Dr. CROTHERS, at the Children's Hospital, in association with the Department of Pediatrics, will give instruction in nervous diseases of children.)
3. NEUROPATHOLOGY, under Dr. COBB, at the Harvard Medical School.

C. MACFIE CAMPBELL, M.D., *Professor of Psychiatry.*

STANLEY COBB, M.D., *Bullard Professor of Neuropathology.*

JAMES B. AYER, M.D., *James Jackson Putnam Clinical Professor of Neurology and Chairman of the Department.*

NEUROLOGY

REQUIRED COURSES

Second Year. — Clinical lectures are given at the Massachusetts General Hospital to the entire class, once a week for eight weeks, second half-year. The object of the course is to give the student a general knowledge of the principles of diagnosis and treatment of diseases of the nervous system as a preparation for later work.

Third Year. — Clinical lectures are given during January of the third year, at the Massachusetts General Hospital. The members of the class are also required to work in the neurological services at the M.G.H. and B.C.H. in sections throughout the year for which work the more didactic teaching of the second year serves as a necessary preparation. This work is practical in character and serves to bring the student into immediate contact with patients

SECOND YEAR

HOURS

Clinical lectures. Dr. AYER. (M.G.H.) *Once a week, April 18-May 9; twice a week, May 11-29.* 10

THIRD YEAR

Clinical lectures. Dr. AYER. (M.G.H.) *Saturdays in January.* 4
 Section teaching. Each student attends ten or eleven two-and-a-half-hour exercises in Neurology. (M.G.H. and B.C.H.) 27

FOURTH-YEAR ELECTIVE COURSES

NEUROLOGY 1. Half-courses, forenoons, or whole courses (clerkships), all day, offered throughout the school year, M.G.H. or B.C.H. Experience has shown that the full-day plan is much more satisfactory than the half-day program.

NEUROLOGY 2. Special opportunities are offered to those who intend to enter this field of medicine.

NEUROPATHOLOGY

REQUIRED COURSE

NEUROPATHOLOGY A. *Second Year.*—The course consists of lectures, laboratory work, and demonstrations, amounting to forty-five hours. The exercises are appropriately integrated with the clinical lectures in Neurology. The lectures introduce conceptions of value for the third-year courses in neurology and psychiatry and for the neurological parts of courses in internal medicine and in surgery. The histopathological part of the laboratory work deals with the inflammatory reactions, the classical degenerations, etc. Gross pathological specimens are also shown and physiological demonstrations are given to illustrate living pathological processes.

SECOND YEAR

HOURS

Lectures and laboratory work. The Staff. *Three times a week, March 30-May 9.* 45

FOURTH-YEAR ELECTIVE COURSE

NEUROPATHOLOGY 1. Research. Opportunities for research are available at the Laboratories of the H.M.S., B.P.H., M.G.H., and B.C.H. Time to be arranged.

VOLUNTARY COURSE

NEUROPATHOLOGY 2. Special work may be arranged with Dr. COBB for varying periods throughout the year.

PSYCHIATRY

REQUIRED COURSES

First Year. — Medical Psychology. Physiology deals with the reactions of the various organs and systems; psychology deals with the reactions of the individual to the environment. In this course on medical psychology the student will have an opportunity of studying briefly the emotional reactions, their modification by experience, the rôle played in these reactions by the various systems; the ability to receive, elaborate, store, and reactivate impressions; variations in constitutional endowment; special lines of weakness; the importance of personal factors in medicine in general, and especially in relation to nervous and mental disorders.

Third Year. — During the second half-year clinical lectures will be given once a week at the Psychopathic Hospital. An endeavor will be made to present examples of all the most important varieties of mental disorder, with special emphasis on the mild and incipient cases which are frequently treated by the general practitioner. More attention will be given to the dynamic analysis and the practical problems of the individual case than to questions of formal classification. Some examples of nervous and mental disorders of childhood will be presented.

For bed-side work the class is divided into small sections, and each student will be given opportunity for personally studying individual cases.

FIRST YEAR

HOURS

Lectures on Medical Psychology. Dr. CAMPBELL. (B.P.H.)	<i>Once a week, March 9–May 25.</i>	10
--------------------------------------------------------	-------------------------------------	----

THIRD YEAR

Clinical lectures. Dr. CAMPBELL and assistants. (B.P.H.)	<i>Once a week, second half-year.</i>	16
Section teaching. Each student attends ten or eleven three-hour exercises.		32

FOURTH-YEAR ELECTIVE COURSES

PSYCHIATRY 1. Whole courses or half-courses, forenoons or all day, offered throughout the year.

VOLUNTARY COURSE

PSYCHIATRY 2. Staff of the Department of Psychiatry, B.P.H., 2–3 P.M., Tuesdays and Thursdays, March.

OPHTHALMOLOGY

GEORGE S. DERBY, M.D., *Williams Professor of Ophthalmology.*

FREDERICK H. VERHOEFF, M.D., A.M., *Professor of Ophthalmic Research.*

J. HERBERT WAITE, M.D., *Assistant Professor of Ophthalmology.*
 HUGO B. C. RIEMER, M.D., *Instructor in Ophthalmology.*
 PAUL A. CHANDLER, M.D., *Assistant in Ophthalmology.*

 BENJAMIN SACHS, M.D., *Assistant in Ophthalmology.*
 THEODORE L. TERRY, M.D., *Assistant in Ophthalmology.*
 CLYDE E. KEELER, S.D., *Research Fellow in Ophthalmology.*

REQUIRED COURSES

Third Year. — Instruction in Ophthalmology consists of:—

1. Four exercises at the Medical School devoted to the demonstration of lantern slides and illustrations of the subject matter to be considered, followed by quizzes based on lecture notes and the foregoing demonstration.

2. Ten or eleven clinical exercises of two and one-half hours each in sections at the Massachusetts Eye and Ear Infirmary, devoted to methods of examination, diagnosis, and treatment. Twelve hours of the foregoing is devoted to the use of the ophthalmoscope.

THIRD YEAR

HOURS

Clinical exercises. Drs. DERBY, DUNPHY, CHANDLER, RIEMER, SACHS and TERRY. <i>In sections throughout the year.</i>	27
Demonstrations and quizzes. (H.M.S.) <i>Once a week, May.</i>	4

FOURTH-YEAR ELECTIVE COURSES

OPHTHALMOLOGY 1. Drs. DERBY, VERHOEFF, and WAITE. Whole course, mornings, occupying two months during the first half-year. Several exercises on advanced anatomy and physiology of the eye, neurology of the visual mechanism, modern methods of examination. Clinical study of the more difficult cases, operations on animals' eyes, operative clinics on hospital patients, study of the pathological histology of the eye. Limited to four men a month.

OPHTHALMOLOGY 2. Half-course, mornings, occupying one month. Comprises the first month of Ophthalmology 1.

PEDIATRICS

 SIDNEY H. WEINER, M.D., *Assistant in Pediatrics.*
 ELIZABETH E. LORD, Ph.D., *Research Associate in Pediatrics.*
 CHARLES E. SNELLING, M.D., *Research Fellow in Pediatrics and Fellow of The National Research Council.*

REQUIRED COURSES

Second Year. — Six lectures are given at the end of the second year to familiarize the student with the study of children's diseases before he comes into contact with patients. In this series are discussed the physiology of nutrition and the principles of infant feeding, the anatomical and physiological differences between children and adults, and relationship between general and orthopaedic surgery and pediatrics.

Third Year. — 1. Six whole class exercises are given during the first half-year, in which the more important aspects of the diseases of childhood are presented. Five whole class lectures, on special subjects, are assigned to pediatrics by the Department of Internal Medicine. Three whole class lectures in preventable diseases are conducted in collaboration with the Department of Preventive Medicine. Each section during its assignment to the children's hospital for thirty-two days, receives correlated instruction in pediatrics, surgery, orthopaedic surgery, etc.

2. Section teaching: Two students are assigned to an instructor for sixteen periods (two hours each) where they are brought into intimate contact with patients in the out-patient department. Three conference hours are held for each section in which certain aspects of pediatrics are illustrated by didactic talks, by demonstration and by quizzes on assigned reading. Five clinics in correlation with Orthopaedic and General Surgery are held at which the students present cases for discussion before the entire section. Five afternoon exercises during each period are devoted to the study of communicable diseases.

Fourth Year. — The fourth-year work consists of instruction at the Children's Hospital, the Infants' Hospital, and at the Children's Department of the Massachusetts General Hospital.

Students are divided into groups and assigned for one month to one of the hospitals. They act as clinical clerks.

One afternoon each week is spent in a Child Hygiene Station for instruction in infant feeding and preventive pediatrics. Instruction in the diseases of the newly born is given at the Lying-in Hospital two afternoons a week to the students during their obstetrical service.

YOUNG, M.D., *Assistant in Obstetrics.*DONALD MACOMBER, M.D., *Research Fellow in Obstetrics.*

REQUIRED COURSES

Third Year.—Instruction is given by lectures, conferences, and clinical teaching. Students are required to take charge, before graduation, of at least twelve cases of labor, under supervision and instruction, to care for their patients during the convalescence, and to make full written reports of the cases.

Fourth Year. — The fourth-year course will occupy the student's entire time for one month. It will be given at the Boston Lying-in Hospital and at the Medical School. During half of the course the student will lodge at the hospital, and devote his time chiefly to attendance on cases in the out-patient clinic. In the course of his work he will be called on to assist at operations in the out-patient department, and will be expected, when his other duties permit, to make ward visits with the physician on duty in the house. In the other half of the course he will conduct the convalescence of the cases delivered by him during his resident service, and make daily ward visits at which clinical instruction will be given in the general management of normal and abnormal labor, in the study of the puerperal convalescence, and in the care of the young infant. Detailed written reports of the out-patient cases attended will be required. His clinical work will be done under the supervision of the department and of the hospital staff on duty, and he will receive careful instruction in the proper methods of delivery and the care of the convalescence. An opportunity will be given each student to study the care of pregnancy in the Pregnancy Clinic, where instruction in pelvimetry and in diagnosis of presentation and position by external examination will be given. Case teaching on four afternoons during the week will be an important feature of the course. The student will also be given at the Medical School a course of demonstrations in operative obstetrics during the first week of each course, and each student will have an opportunity to perform the different operations on the manikin.

REQUIRED COURSES

Instruction will be given by amphitheatre clinics, lectures, and conferences, together with section teaching in the wards and out-patient departments of the hospitals and in the laboratory of surgical research. Elective and voluntary courses will be given in the laboratories of the Harvard Medical School and in the wards and operating rooms of the hospitals.

Second Year. — The course, which is designed to prepare the student for his hospital contact with patients, will begin in February of the second year. Instruction will be given by clinical lectures and section work in the various hospitals and in the surgical laboratory. The course will cover the general principles of surgical treatment: surgical technique, the use of apparatus and instruments, and an introduction to clinical surgery, beginning with inflammation, trauma, etc.

Third Year. — The course is conducted largely in the out-patient departments of the hospitals affiliated with the School. Owing to a new arrangement, the students are to be divided into three main groups, each group in rotation being apportioned to one of the three major hospitals affiliated with the School for instruction in Surgery over a sixty-four day period. During this period they will have their general surgery, urology, and roentgenology at the hospital to which they are assigned, and will also receive instruction in gynaecology at the Woman's Free Hospital and in laryngology at the Massachusetts Eye and Ear Infirmary.

Fourth Year. — A service of not less than three months as clinical clerk in the surgical wards of the M.G.H., B.C.H., or P.B.B.H., is required of each student, except for those who take at least three months in Medicine, in which case two months of surgery are required.

SECOND YEAR

HOURS

Clinical lectures. Drs. RICHARDSON, CHURCHILL, MILLER, and associates. M.G.H., and B.C.H. <i>Once a week, January 29–May 29.</i>	16
Section work. Drs. LUND and BALCH. Laboratory of Surgical Research, H.M.S. <i>Three times a week for two hours, January 29–May 8. Each student has nine exercises.</i>	38
Clinical exercises. M.G.H., and B.C.H. <i>Once every alternate week, January 31–April 4 and May 11–29.</i>	6

THIRD YEAR

Amphitheatre lectures. Drs. CUSHING, RICHARDSON, WALKER, CHURCHILL and associates. P.B.B.H. <i>Once a week throughout the year.</i>	32
Exercises in sections in the wards and out-patient departments at the M.G.H., B.C.H., and P.B.B.H. <i>Each section has thirty-two exercises of two and a half hours each and twenty-one exercises of three hours each.</i>	143
Genito-urinary Surgery. Lectures. <i>Second half-year.</i>	6
Section work. M.G.H., B.C.H., and P.B.B.H. <i>Each student has ten or eleven two-and-a-half-hour exercises.</i>	27

FOURTH YEAR

Clinical clerkship at M.G.H. (Surgery 1, Dr. RICHARDSON and associates), B.C.H. (Surgery 2, Drs. WALKER, CHURCHILL, and associates), or P.B.B.H. (Surgery 3, Dr. CUSHING and associates).	288 or 432

FOURTH-YEAR ELECTIVE COURSES

TROPICAL MEDICINE 1. Opportunities for work in the Service for Tropical Diseases at the Boston City Hospital, either for graduates as house-officer or for undergraduates as clinical clerk; time to be arranged upon consultation with Dr. GEORGE C. SHATTUCK.

Medical Zoölogy and Tropical Medicine

The following courses in Medical Zoölogy and Tropical Medicine are given in the Departments of Comparative Pathology and Tropical Medicine. Students coming from tropical or subtropical countries, or those who intend to practise in such countries, are especially urged to elect these courses. Further details concerning the same may be obtained from Dr.

R. P. STRONG, Room 245, Building D, or from Dr. E. E. TYZZER, Room 229, Building E.

1. PROTOZOÖLOGY. Drs. TYZZER and CLEVELAND. Half-course, afternoons. October.

Following a brief preliminary survey of the field of Medical Zoölogy, such protozoa as are considered of medical importance will be taken up with special reference to their identification and life-cycles.

2. HELMINTHOLOGY. Drs. AUGUSTINE and SANDGROUND. Half-course, afternoons. November.

It is designed to give the student a general knowledge of the biology of the helminthes, and to acquaint him with those species parasitic in man and the diseases caused by them.

3. MEDICAL ENTOMOLOGY. Drs. BEQUAERT and HERTIG. Half-course, afternoons. December.

The course is a brief survey of the field of Medical Entomology. While some attention is given to the classification and structure of arthropods, emphasis is placed on the rôle played by insects as disease transmitters.

4. INFECTIOUS DISEASES. Drs. STRONG, SELLARDS, SHATTUCK, and THEILER. Half-course, afternoons. January.

The course consists of lectures, laboratory work, and clinical instruction.

The most important infectious and other preventable diseases of tropical and foreign countries will be dealt with.

See also Comparative Pathology, p. 72.

History of Medicine

VOLUNTARY COURSE

SEMINAR ON THE HISTORY OF MEDICINE. Dr. STREETER. Thursday evenings, October through January. Open to third- and fourth-year men.

Physical Education

The instructor in Physical Education plans the work in order to benefit the health of the medical student and also to give him an opportunity of realizing the importance of systematic exercise in the maintenance of health. To this end close coöperation is maintained with those in charge of the physical examination and the health of the students. A student may elect the type of exercise best suited to his particular needs as advised at the time of his physical examination.

RESERVE OFFICERS' TRAINING CORPS

A medical unit of the Reserve Officers' Training Corps provides systematic training for the purpose of qualifying selected students for appointment in the medical officers' Reserve Corps in the military forces of the United States. Thirty lectures on medico-military subjects are given by the Professor of Military Science and Tactics during each of the four school years to the students who have been enrolled as members of the medical unit. There are two courses of instruction, basic and advanced, the former occupying the first two years, the latter the last two years of the medical course. Selected students are eligible for appointment as internes in Army hospitals for twelve months. This follows appointment to the Reserve Corps upon receiving the degree in medicine.

In addition to the instruction by means of lectures, students who have completed the basic course and have been enrolled in the advanced course will attend a course of military instruction of about six weeks' duration at a summer camp.

Having completed the basic course, students are entitled to draw, during the last two years, while enrolled in the advanced course, commutation of rations amounting at present to approximately \$108 per annum, paid quarterly. This, with camp allowances, amounts to some \$250 for the last two years. All expenses of the camp term, including transportation, are borne by the War Department. This camp of instruction lasts six weeks and is held at the Camp designated by War Department Order. With the exception of 1928 the summer training has been given at the Medical Field Service School, Carlisle, Pennsylvania.
